

Automotive Technician Training Center presents...

SUPPORT TRAINING & CERTIFICATION

OPEN HOUSE TRAINING DEMONSTRATION

COME IN AND FIND OUT WHAT TECHNICIANS & SHOP OWNERS NEED TO KNOW

When should you use a scanner? When should you use a digital multimeter?
When should you use a scope? When should you use the emissions analyzer?
Why you can't fix it right the first time? Why does it take so long to diagnose the problem?
Why can't you run monitors? What equipment will you need for the future? Will you have a future?
Why aren't you making more money? Why is your shop not busy? Where are all the customers?

Subjects to be discussed: Electrical & Electronic circuits, Cranking, Charging & Ignition Systems, Wiring diagrams, Emissions systems failures, 5-Gas Analysis, Computer controls, Sensor Testing, Fuel Injection systems, Evap Sys Diagnosis, Digital Meter testing, Scanner diagnostics, Scope analysis, Current Ramping, OBDII, Monitor Readiness, MIL Lights, DTC's, Mode \$06, Anti-lock brakes, A/C systems, Alternate Fuels, Hybrids, Controller Area Network Bus Systems (CAN), PCM Reprogramming.
